GUIDE FORMULATION || page 1 of 2

2K-Polyaspartic floor coat Flex Coat, self-leveling, solvent-free 60 Shore D

Basis Polyaspartic (polyaspartic ester / isocyanate HI
--

	Guide Formulation of Covestro		WKHB 512/2
Component A	Desmophen NH 1420	(1)	21.5
	Desmophen NH 1720	(1)	9.2
	Sylosiv A4	(2)	0.7
	Tego Airex 944	(3)	0.4
	Tego Wet 250	(3)	0.1
	SILLITIN Z 86	(4)	26.7
	Colortherm Green GN	(5)	4.7
Component B	Desmodur E 2863 XP	(1)	27.5
	Desmodur ultra N 3900	(1)	9.2
	Total % by weight		100.0

Recommendation For better dispersibility and mechanical properties SILLITIN Z 86 PURISS is

recommended.

For brighter applications SILLITIN Z 89 / SILLITIN Z 89 PURISS are suitable.

Mixing Preparing component A under vacuum (approx. 200 mbar) has been proved ideal

regarding the incorporation of air and to achieve the mentioned working time.

Allow component A to age for at least 24 h prior to use.

Processing Premix the two Desmodur types prior to use.

Mix component A and B properly prior to the application.

The tough coat can be applied by trowel.

Suppliers (1) Covestro

> (2) Grace

(3)Evonik Tego Chemie

HOFFMANN MINERAL (4)

(5) Lanxess
